I, the undersigned owner or agent of the owner of the pet identified, authorize the veterinarian(s) and staff at Windermere Animal Hospital to perform the above procedures(s). I understand that some risks always exist with anesthesia and surgery and that I'm encouraged to discuss any concerns I have about those risks with the attending veterinarian before the procedures(s) is/are initiated. My signature on this form indicates that any questions I have regarding the following issues have been answered to my satisfaction:

- The reasonable medical and/or surgical treatment options for my pet
- Sufficient Details of the procedures to understand what will be performed
- How fully my pet will recover and how long it will take.
- The most common and most serious complications
- The length and type of follow-up care required
- The estimate of the fees for all services provided.

We require a blood profile before anesthesia and surgery to ensure that your pet is in a low-risk category. The latest technology lets us run safe, accurate blood chemistries minutes before anesthetic induction. These tests are similar to those your own physician would run were you to undergo anesthesia. In addition, the results of these tests will serve as reference values for future use should your pet become ill. Please see the chart below to determine which tests apply for your pet.

Pet Health Screen 1	Pet Health Screen 2	Pet Health Screen 3
